

## **CLAIM LISTING**

1-38. (Cancelled)

39. A support system for stage lighting, grip equipment or other stage apparatus comprising:

a rail having at least one channel and at least one lip;

a component having means to releasably secure said component to said rail by engaging said lip;

said component also having means to releasably engage one of a stage lighting, a grip equipment, or an other apparatus used to obtain an appropriate lighting effect.

40. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a tube and a handle, the handle screwed into the tube.

41. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a cylindrical pin.

42. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a baby pin.

43. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a swivel hook.

44. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a male post mount.

45. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a bent pin.

46. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises an angled pin.

47. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a hook.

48. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a junior or senior mount.

49. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a junior or senior pin.

50. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a bail pin.

51. The support system of claim 39 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a 45 degree baby pin.

52. A support system for stage lighting, grip equipment or other stage apparatus comprising:

a rail having at least one channel and at least one lip; and

a component comprising:

means for releasably securing said lip; and

means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector.

53. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a tube and a handle, the handle screwed into the tube.

54. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a cylindrical pin.

55. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a baby pin.

56. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a junior or senior mount.

57. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a 45 degree pin mount.

58. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a swivel hook.

59. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a male post mount.

60. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a bent pin.

61. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises an angled pin.

62. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a hook.

63. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a junior or senior pin.

64. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a bail pin.

65. The support system of claim 52 wherein the means for releasably engaging one of a fresnel lamp, an open faced lamp, a scoop lamp, a soft box, a combination lighting equipment, a flag, a net, a filter, a screen or a reflector comprises a 45 degree baby pin.

66. A support system for stage lighting, grip equipment or other stage apparatus comprising:

- a rail having at least one T or mushroom shaped channel;

- a component adapted to be releasably attached to said rail comprising:

- means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect;

- a base plate to which the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect is permanently attached;

- a knob assembly for releasably securing the base plate to the rail including a knob and a T-bolt with a head adapted to fit within the rail channel;

- the knob permanently secured to the T-bolt; and

- the T-bolt to be fastened into a cavity in the knob;

the base plate to be releasably attached to the rail by inserting the T-bolt head within the rail channel and rotating the knob.

67. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a tube and a handle, the handle screwed into the tube.

68. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a cylindrical pin.

69. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a baby pin.

70. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a 45 degree pin mount.

71. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a swivel hook.

72. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a male post mount.

73. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a bent pin.

74. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises an angled pin.

75. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a hook.

76. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a junior or senior mount.

77. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a junior or senior pin.

78. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a bail pin.

79. The support system of claim 66 wherein the means to releasably engage one of a stage lighting, a grip equipment or an other apparatus used to obtain an appropriate lighting effect comprises a 45 degree baby pin.
